**Email:** arbietomas@gmail.com

## SUMMARY

---

A Junior Full-stack developer specializing in building solutions with JavaScript, TypeScript, Supabase, and React.js. I work on projects including building modern web applications, responsive designs, and RESTful APIs. I've helped startups and small businesses grow and streamline their processes through software solutions. I'm passionate about creating efficient, user-friendly applications. Currently, I'm diving deeper into modern web technologies, focusing on integrating best practices and new techniques into my development workflow.

## EXPERIENCE

---

### **B1G Salesforce Management System | Junior Full Stack Developer** **Nov 2025 - Jan 2026**

- Built an enterprise distribution management platform to handle the full lifecycle of field sales operations—from inventory allocation and order processing to remittances, client management, and agent performance tracking. Implemented role-based security, real-time syncing, approval workflows, automated alerts, and analytics dashboards to give stakeholders clear operational insight.
- Designed and implemented a multi-tenant system allowing multiple shops to operate within a shared application and database, with complete data isolation and access control per tenant.

### **B1G Official Website | Junior Full Stack Developer** **Sept 2025 - Oct 2025**

- Developed the official corporate website for B1G Corporation featuring dynamic product pages, categorized blogs, and a responsive design optimized for all devices.
- Built a customer inquiry system and “Be Our Partner” page, boosting communication and increasing partnership engagement.
- Integrated a newsletter system with automated email delivery and Google Sheets tracking to streamline updates and keep users informed.

### **B1G Asset Management | Junior Full Stack Developer** **June 2025 - Sept 2025**

- Developed a system that tracks assets, employees, departments, locations, maintenance, and approval workflows with authentication, validation, file uploads, depreciation value, and email notifications.
- Centralizes and automates asset lifecycle management (inventory, assignment, maintenance, approvals) with secure access and analytics for operations.

### **De La Salle Univeristy-Dasmariñas | Capstone Full Stack Developer** **Sept 2024 - May 2025**

- Developed a full-stack veterinary clinic management system using React, TypeScript, Node.js, and MongoDB with secure Google OAuth authentication and role-based access for pet owners, vets, and admins.
- Automated appointment scheduling, digitalized medical records, and introduced real-time notifications to reduce manual tasks and minimize paper usage.
- Streamlined clinic operations with user-friendly, role-specific dashboards, improving efficiency and enhancing the overall customer experience.

## EDUCATION

---

### Bachelor of Science in Information Technology

Aug 2021- July 2025

De La Salle Univeristy - Dasmariñas

- Dean's Lister A.Y. 2021-2023
- Thesis on "DEVELOPMENT OF AN INTEGRATED APPOINTMENT SCHEDULING ONLINE SYSTEM FOR PET CROSSING ANIMAL CLINIC IN IMUS CAVITE".

### Science, Technology, Engineering, and Mathematics (S.T.E.M.)

Aug 2019 - June 2021

De La Salle Univeristy - Dasmariñas Senior High School

- A.Y. 2020 - 2021 Academic Award with High Honors
- A.Y. 2019 - 2020 Academic Award with Honors

### De La Salle University - Dasmariñas

Aug 2015 - June 2019

De La Salle Univeristy - Dasmariñas Junior High School

- With Distinction (2018-2019)

## ADDITIONAL INFORMATION

---

### Technical Skills

- Node.js & Express.js
- React
- Typescript
- Javascript
- RESTful API & GraphQL
- Mongodb & SQL Databases
- Supabase
- Github & Git
- Vercel & Render
- TailwindCss

### Personal Skills

- Collaboration
- Problem Solving
- Time Management
- Attention To Detail
- Communication
- Adaptability
- Continuous Learning
- Analytical Thinking
