- A.Y. 2019 - 2020 Academic Award with Honors

PROFILE INFO

Junior full-stack developer specializing in JavaScript, TypeScript, React.js, and Supabase. I build modern, responsive web applications and RESTful APIs, helping startups and small businesses streamline their processes through efficient, user-focused solutions. Passionate about clean code, performance, and continuously improving my workflow with modern web technologies.

EXPERIENCE

BIG CORPORATION

June 2025 - Present

Junior Full Stack Developer

BIG ORDERING SYSTEM

- Architected and developed a scalable multi-tenant B2B SaaS platform using React, TypeScript, and Supabase, supporting 500+ clients
- Implemented RLS-based role management, automated client provisioning, and real-time inventory and order tracking
- Reduced order processing time by 40% through optimized workflows and system design
- Delivered a fast, intuitive UI using modern React patterns, React Query, and reusable UI components.

BIG OFFICIAL WEBSITE

- Built the official corporate website for BIG Corporation with dynamic product pages and a categorized blog system
- Implemented an inquiry page to improve customer communication and lead handling
- Developed a responsive layout optimized for all devices
- Added a newsletter subscription system with automated email delivery and Google Sheets integration

BIG ASSET MANAGEMENT SYSTEM

- Designed and built a full-stack Asset Management System using TypeScript, Node.js, Express, MongoDB, and React
- Implemented end-to-end asset lifecycle tracking with role-based access control and real-time dashboards
- Integrated security features including JWT authentication, CSRF protection, rate limiting, and multi-layer validation
- Developed an admin dashboard for content management, user roles, and analytics to improve system control and security

CAPSTONE

Nov 2024 - May 2025

De La Salle Univeristy Dasmariñas

LEAD DEVELOPER

- Developed a full-stack veterinary clinic management system using React, TypeScript, Node.js, and MongoDB with secure Google OAuth authentication and role-based access for pet owners, vets, and admins.
- Automated appointment scheduling, digitalized medical records, and introduced real-time notifications to reduce manual tasks and minimize paper usage.
- Streamlined clinic operations with user-friendly, role-specific dashboards, improving efficiency and enhancing the overall customer experience.
